

History Moves Too Slow
(Thom Flora/Bill Kenner)

Well, I know, no status quo can ever hold for long
Ebb and flow, easy come easier go
You had to get, while you could get it
I took your best shot in a TKO

Everybody swears that you'll come back
Everybody's so dead sure
History repeats itself I'm told
History moves too slow

Hurry up and wait, waitin' for a miracle that never shows
Wastin' time, travelin' in parallel lines
I gotta get ya, while I can reach ya
Can't sit on my hands and watch the hours creep by

Everybody swears that you'll be back
Everybody's so dead sure
History repeats itself I'm told
History moves too slow

I know you still love me, in your own way
You know me well enough, I won't wait
I can't just wait

<SOLO>

Everybody swears that you'll be back
Everybody's so dead sure
History repeats itself I'm told
History moves too slow

Love Breaks Everybody
(Thom Flora/Bill Kenner/Josh Leo)

Day after day there's a pressure to live what you've only been
dreamin'

Making you blind to a face that could change your mind
It might be staring you down and you'd never know

You grew up hearing that love isn't real if it don't last forever
You've been told someday your prince will come all of your life
Think how many times you have fallen for stories like those
Whoever said you can't get hurt by what you don't know

Love breaks everybody
When it mends you'll come back stronger
But love breaks everybody

A few lonely nights sittin' still by the phone should give you the
picture
Give up the ghost, you know he gave up on you
It's not really such a disaster, a matter of time
Your future depends on how much of the past you can leave behind

Love breaks everybody
When it mends you'll come back stronger
But love breaks everybody
Love breaks everybody
First time takes a little longer
Love breaks everybody

Love only breaks everybody

<SOLO>

It's not really such a disaster, a matter of time
Your future depends on how much of the past you can leave behind

Love breaks everybody
When it mends you'll come back stronger
But love breaks everybody
Love breaks everybody
First time takes a little longer
Love breaks everybody

Love breaks everybody
Everybody

Walk The Wire

(Thom Flora/Bill Kenner/John Jarvis)

Cool as a salad, she steps out of a cab
She left a trail on the sidewalk, seemed real easy to grab
I can almost feel her breathin', touch her, glidin' like an ocelot
If I could whistle for a horse I would scoop her up, gallop through the
canyon
But I'm not Lancelot

So I gotta walk the wire
Walk the wire
You and I, stride for stride in power glide

Slow as a ballad, my elbows fightin' the crowd
She's got a lead on me, don't want her stretchin' it out
I keep my eye on a line with the swing, lookin' at the moves she's got
If I could shoot from the hip I would swoop her up, save her from a
dragon
But I'm not Lancelot

So I gotta walk the wire
Walk the wire
You and I, stride for stride in power glide

Maybe the girl's slowin' down
'Cause I'm gaining ground

<SOLO>

So I walk the wire
Walk the wire
You know I gotta walk the wire
Walk the wire
You and I, stride for stride for stride for stride in power glide
Walk the wire

Kiss The World Goodbye
(Thom Flora/Bill Kenner)

With the time bombs ticking loud around us
Any minute they could all explode
When they do who knows which way the wind is gonna blow

Outside the tribes are trying to surround us
'Cause the chiefs all have their say to say
We've gotta hide away and

Kiss the world goodbye
Let it slide
There's always a morning no matter how bad the night
So we're gonna kiss the world goodbye

In the distance we can hear the war-drums poundin'
As the whisper-jets fly screamin' by
We could pull the 'lectric blanket up across our eyes

Build a fort among the pillows
Use your T-shirt for our flag
We've gotta hide away and

Kiss the world goodbye
Let it slide
There's always a morning no matter how bad the night
So we're gonna kiss the world goodbye

We know what we don't want to know
No muddy water is gonna drown us
They can't control us any more
Let the show go on without us

<SOLO>

We gotta hide away and
Kiss the world goodbye
Let it slide

There's always a morning no matter how bad the night
So we're gonna kiss the world goodbye
Let it slide
There's always a morning no matter how bad the night
So we're gonna kiss the world goodbye
We're gonna kiss the world goodbye

Welcome To The Ice Age
(Thom Flora/Bill Kenner)

It's freezin', freezin' outside
Can't keep a fire burnin' in here
Like freezin' on the inside, trapped here with you
You're breathin', I see your breath
That means you've gotta be alive, gotta be alive

My fingers keep sticking to things made of metal
The winds make a pain in my ear
I can't feel the snow in my fingers or toes
Welcome to the Ice Age
In blizzard conditions I'm froze like a statue
No pigeons keeping me warm
No heat-seeking missles can crack these icicles
Welcome to the Ice Age

I'm sweatin', sweatin' it out
Scared stiff of terminal frostbite
Sweatin', doin' without, what makes you so cold
I need you, don't need the chill
A red-hot coal just can't survive, just can't survive

My fingers keep sticking to things made of metal
The winds make a pain in my ear
I can't feel the snow in my fingers or toes
Welcome to the Ice Age
In blizzard conditions I'm froze like a statue
No pigeons keeping me warm
No heat-seeking missles can crack these icicles
Welcome to the Ice Age

<SOLO>

My fingers keep sticking to things made of metal
The winds make a pain in my ear
I can't feel the snow in my fingers or toes
Welcome to the Ice Age
In blizzard conditions I'm froze like a statue
No pigeons keeping me warm
No heat-seeking missiles can crack these icicles
Welcome to the Ice Age

Light A Candle
(Thom Flora/Bill Kenner)

When I'm up against it, frustrated, can't focus the anger
When I'm low down, so down I wanna cry

When I'm burnin' with an urge to curse the darkness
And I feel things can't turn any worse
I need a woman's touch, a woman's touch
Can light a candle
Light a candle
A woman's touch can light a candle

<Vocal interlude>

Half crazy, all bewildered, completely lost in any direction
Headed so low down I wanna die

When I'm burnin' with an urge to curse the darkness
And I feel things can't turn any worse
I need a woman's touch, a woman's touch
Can light a candle
Light a candle
A woman's touch can light a candle

<Sax interlude>

When I'm burnin' with an urge to curse the darkness
And I feel things can't turn any worse
I need a woman's touch, a woman's touch
Can light a candle
Light a candle
A woman's touch can light a candle

Out Of My Mind

(Thom Flora/Bill Kenner/Michael Smotherman)

Far from home, far from everything I know
So alone, forsaken, forlorn
Cold and dark, are even the stars ashamed to know me
In my heart I'm feeling the storm
In every single way my will is growing stronger
Night and day standing my ground
They can never take what I will never give them
Never break, never break down

No I don't need a window, I can see right through the walls
To where we used to laugh and sing, I can see it all
I see you smiling and dancing in the sun
I remember everything we've done

They can't lock you out of mind
They can't lock you out of my mind
They can't stop me dreamin' of you
No matter what they do

Empty nights, rivers of anger on my pillow
What hurts the most is you're lonely too
I'm having to trade the things I love, to save what I believe in
Out of love I do this for you

No I don't need a window, I can see right through the walls
To where we used to laugh and sing, I can see it all
I see you smiling and dancing in the sun
I remember everything we've done

They can't lock you out of mind
They can't lock you out of my mind
They can't stop me dreamin' of you
No matter what they do

<SOLO>

I can see it all
I see you smiling and dancing in the sun
I remember everything we've done

They can't lock you out of mind
They can't lock you out of my mind
They can't stop me dreamin' of you
No matter what they do

They can't lock you out of my mid

The Fool You Made Of Me
(Thom Flora/Bill Kenner)

We both went right to the wall with it
You bounced back straight, I took off like a bankshot from hell
You cast your next show, I was not in it
Now you're back with a new script lookin' to sell
Well, I still know that look so very well

I remember how it used to feel
When red-hot lava turned into cold blue steel
I've gotta try very hard
To keep your picture in the dark until
I can shake the fool you made of me

How do I forgive and forget it
How can I open the windows and all those closed doors
You took the easy out your last visit
You can kill with a look, am I beggin' for more
You killed me with that very look before

I remember how it used to feel
When red-hot lava turned into cold blue steel
I've gotta try very hard
To keep your picture in the dark until
I can shake the fool you made of me

I need to hear the ring of truth inside the words that you say

<SOLO>

Yeah, I still know that look so very well

I remember how it used to feel
When red-hot lava turned into cold blue steel
I've gotta try very hard

To keep your picture in the dark until
I can shake the fool you made of me

Don't wanna be a fool

What They Say
(Thom Flora/Bill Kenner)

They say I'm in way over my head
They think I should try to play it safe instead
Well I'm getting' a little tired of having to listen
Feelin' the heat from all my fair-weather so-called friends
They say I'm too easily mislead
Well let me tell you somethin'

I don't wanna think about, I don't have to take it all besides
Who are they, who cares what they say
I don't wanna talk about, I don't wanna hear it all
Who are they, who cares what they say
Who cares what they say
They think I only know what goes on in my head

They say your love is meant to deceive
They think I'm playin' way out of my league
Well I've had it up to here with smilin' innuendos
Sly remarks from the ones who think they know me best
They say I'm too quick to believe
Well let me tell you somethin'

I don't wanna talk about, I don't wanna hear it all tonight
Who are they, who cares what they say
I don't wanna think about, I don't have to take it all
Who are they, who cares what they say
Who cares what they say
They think I only know what goes on in my own head

I know where I'm goin', I've got this thing all mapped out
Don't worry for me, my head isn't lost in the clouds
I know what it's all about

<SOLO>

Let me tell you somethin'

I don't wanna think about, I don't have to take it all besides
Who are they, who cares what they say
I don't wanna talk about, I don't wanna hear it all
Who are they, who cares what they say
Who cares what they say
They think I only know what goes on in my own head

I don't wanna talk about, I don't wanna hear it all tonight
Who are they, who cares what they say
I don't wanna think about, I don't have to take it all
Who are they, who cares what they say
Who cares what they say
